OUR MISSION

The Pelham Education Foundation seeks to enhance the quality of public education in Pelham with the help of educators, citizens, parents, students, alumni, businesses and foundations. We fund educational programs that are outside the annual school budget and award grants for projects that:

- Strengthen and enrich the curriculum by helping to develop and promote innovative programs.
- Support additional faculty training and resources.
- Provide funding for special school facilities and equipment.

Founded in 1995, The Pelham Education Foundation is a 501 (c) (3) not-for-profit organization, directed by a non-salaried board of community members.

Please send donations by check to:

The Pelham Education Foundation

C/O Erika Kalyvas
999 Pelhamdale Avenue
Pelham, NY 10803

Help us get to **NOW**

Donate Today to The Pelham Education Foundation

Fly our balloons on your doorstep

Saturday, April 25

The Pelham Education Foundation raises funds to help create a dynamic 21st century learning environment for our children.

Enhancing technology, the core curriculum, the arts and specialized facilities will give our students the tools to succeed in an increasingly competitive global economy.

- Creativity
- Cultural awareness
- Critical thinking
- Project based learning
- Flexibility
- Collaboration

These skills are vital in the interconnected workforce and society of today. With the right technology and your help we can build these skills and bring our classrooms, and our children, to **NOW** and into the future.

Some examples of the Foundation's 21st century initiatives to date:

- Multi-media Foreign Language Lab
- Broadcast Production Studio
- Molecular Biology Lab
- Equipment for Principles of Engineering class
- Digital keyboards for Digital Music class
- Technology Centers & SMART Boards
- Podcasting technology for teacher lectures and student presentations
- Distance learning
- Artists in residence programs
- Dancing Classrooms

What our educators say

Jeannine Clark,
Principal of Pelham Memorial
High School

"By engaging in hands-on activities, problem-solving and project-based learning, students become motivated in ways not always possible in more traditional textbook-and-lecture classes."

Gail Sider,
4th grade teacher, Siwanoy School,
on SMARTBoards:

"...This organic marriage of a 21st century tool with the basics of elementary curriculum, a relationship that is repeated in math, and science, and social studies, is what makes my SMARTBoard not a frill but a fundamental classroom tool."

Alan Woliner,
on the new Principles of
Engineering Course:

"This course.... allows students to apply the concepts they learn to real world issues in fields like alternative energies,

mechanical toys, structures and robotics. It makes math and science less abstract and more relevant for students."

Anne Marie Duignan,
Chair of the World Languages Department
on the Language Lab:

"...the lab enables teachers to differentiate instruction for students of various abilities and learning styles. The multimedia equipment increases student engagement in learning about foreign languages and cultures by providing authentic materials in real time."
